June 18, 2020

Dear Mr. Bayne:

RE: Alberta Assessment Model Review

CEPA represent Canada's transmission pipeline companies who operate the majority of transmission pipelines in Canada, and large pipelines in the United States. Our members operate critical infrastructure that move the vast majority of Canada's daily crude oil and natural gas from producing regions to markets throughout North America, enabling Canadians' well-being and quality of life.

Overall, CEPA is supportive of the Alberta Government's objective to review the assessment model and has found participation in the review process positive. CEPA would like to provide our response to the feedback requested in your June 2, 2020 email. Overall, CEPA members approve of the data involved in the scenarios presented. Moreover, as Scenario D most closely reflects the actual value of members assets, CEPA members recommend that it be implemented moving forward.

As always, CEPA looks forward to continued engagement on this matter. Please do not hesitate to contact the undersigned if you have any questions or require clarification regarding the above recommendation.

Yours sincerely,

Kai Horsfield
Manager, Policy and Regulatory
